Significance of the Star/LAMAT Trecena

The vertical columns of the Tzolk'in illustrate the 13 Uinals. Each represents a 20-day cycle that completes the progression of each of the 20 Day Signs. The numbers of the Uinals hold the same meaning as they do with the Galactic Tones, except for Uinal 7 (core days), which represents the Void of all possibility.

The Star/LAMAT trecena is the Ascending trecena of the Tzolk'in, in the 13 Uinal of Ascension, and our final Ascension takes place on 13 Sun/AHAU, the most Holy of Day Signs of Spiritual Illumination. The Ascension of the Star/LAMAT trecena completes a Total Realization of the 260-day journey.
