

HOLY CROSS ORACLE

The Secret of the Sacred 0-19 Code

An article by Jose Jaramillo

The ancient scientist hoped that by educating future generations and maintaining the existence of the secret knowledge with elaborate rituals, and simple instructions on how to retrieve the sacred wisdom, the eventual deciphering of the real message would save millions of their fellowship humans from certain annihilation when the end of time arrived at the precise moment. They hoped that there would be no Dark Age ruled by a corrupt priesthood, which would tell their good-hearted church goers 'not to look up to the sky or study the heathen astrological sciences,' knowing well that a thorough study of classical mythology, math and astronomy would have opened their eyes to the scientific wisdom of the ancient messages. That is why the Mayan used their Sacred Calendar to track the energies of every single day and to be prepared for each day in all senses, that is why we suggest that people should start using the Mayan Calendar as a spiritual and prophetic tool that would allow each individual to understand the courses of nature that would led us to the end of the Great Mayan Cycle:

We know that we are a reflection of this sacred calendar because is made of 13 numbers, tone or aspects of creation, which represent our feminine energies and the 20 day signs or archetypes that represent our masculine energies, together match the 260 different combination of the sacred count, which match our gestation cycle as spiritual human beings. We know by science that the helix of our DNA spiral thirteen time and we need 20 amino acids, which are essential for the life of a human being. Also we have 13 main joints in our body and 20 fingers and toes, so we are really a reflection of the Sacred Calendar.

Every day within the Mayan Calendar we have the Holy Cross or Mayan Oracle. It is interesting to find out that in order to use this oracle correctly we need a mathematical code the Mayan call the 0-19 code. The energy of the Sun, which represent the last and the twenty days sign in the Mayan Calendar was counted as zero, the reason it is called the 0-19 code.

The 0-19 Code within the Mayan Calendar allows us to understand in more details the meaning of every day and to apply this tool in our lives. Also it is interesting to find out that the Koran has a 0-19 Code within the scriptures that some scholars called the Signature of God.

The following are some interesting insights on this 0-19 Code as it has been found in the Koran and the Bibie. (The Linked Video from Stan Tenen on the Powerpoint presentation, offers interesting insight on codes found in scriptural texts.)

Holy Koran, SURAH 18, verses 54-56

Is it a coincidence that the recent discovery and identification of our DNA Code breaks down into a chemical and physical structure of 64 triplets, which has a resonance field that can be

likened to a whole note of music, (1, 1/2, 1/8, 1/16, 1/32, 1/64)? Is this resonance field of music and our DNA also connected to color or light wave vibrations, which all interact from within the physical body and transmit a language that communicates to our exterior world and universe?

As we continue this study on the spiritual frequency and meaning of the 20th chapter of Ta Ha, as revealed in the Holy Koran and translated into a full musical production and presentation, and gifted to the Nation by the Honorable Minister Louis Farrakhan on February 27, 2009, we are now looking within to find the key of this harmonic conversion that comes to us as the still, small voice of God within. Through this process, we are being transformed and elevated to a new spiritual awakening as we enter into other dimensions of thought.

We are using the same mathematical and scientific approach as the Honorable Elijah Muhammad was used to teach this sacred number of the 0-19 code within the Koran. With the proper use and application of this language, we are being brought stage by stage into higher levels or dimensions of understanding as we are giving birth to a new cultural expression and a new way of life. Counting the letters of our DNA, the amazing result is found, (D=4; N=14; A=1) =19. This Number 19 represents the mathematical code of the Holy Koran's revelation and introduces us to a VIGESIMAL system of counting by 20's, that is use among the Mayan Calendar with the 0-19 code of their Holy Cross Oracle. The resolution of 19 equals 10 and 10 resolves to 1 back to wholeness and the one God.

Looking into the field of light and its light waves of color bands emitted through a glass or crystal prism, we are able to see the basic six colors of refracted light. Is it not a coincidence that the collective wavelength of these colors (red, orange, yellow, green, blue and violet) added together by measurement of their wavelength equals 1320? This great discovery connects us to spiritual significance of light and color, to musical notations and to our biochemical composition of our DNA. The Mayan Calendar with the 13 number or tones and the 20day sign or archetypes carries the same frequency of vibration of 13:20, which is the measurement of the wavelength of the six colors of the rainbow. Let us quote from the book: **"Beginnings, the Sacred Design"** by Bonnie Gaunt, one can read on pages 85-86, the following words:

"The rainbow that reached across the sky was a beautiful sight to behold. It was a display of the colors of visible light—white light. The colors were arranged in the order of the spectrum red followed by orange, yellow, green, blue and violet. The length of the light wave determines each of the colors of white light. The units commonly used for this measurement are the mill micron, which is denoted by the symbol uu, which equals one millioneth of a millimeter; and the Angstrom Unit (A.U.), which is one-tenth millioneth of a millimeter. In the table below, I have converted these to inches. These numbers are derived from the center of each color range giving the truest color. When these colors are combined in the precisely proper amounts, all apparent color disappears and the result is white. When all the length of the light waves is added, the aggregate is .00001320 of an inch. The number 132 is the addition of the letter-numbers for the word white in Hebrew. It is a number that is basic to the number code of the Creator, as we shall

see in the next chapter. ... It beautifully represents the Elohim, the Creator. And not surprisingly its spectrum of color bears the number of his name."

Book "Beginnings, the Sacred Design" by Bonnie Gaunt

After we read from Mrs. Bonnie Gaunt we see how adding a zero to 132 (0), we discover the inner and outer workings of God as represented in musical notations and color and light vibrations, added to the biochemical design of our cellular structure of the DNA, operates from the same numbers repeated in cycles in the manifestation of the entire Divine Creation. Turning to page 116-117 of the same book, we review the musical scale of a whole note of music that's a vibration of the 132nd part, vibrations per second of the letter and musical note of C, which is an octave below middle C which vibrates at 260 vibrations per second and above middle C, we have 584 vibrations per second and so on and so forth until we count seven octaves in musical notations on the piano keyboard. It is interesting that the Sacred Calendar is made of 260 days and the cycle of Venus is made of 584 days same as it was the vibrations per second of the letter and musical note, but lets quote from the same book:

"The laws of musical harmony were not invented by man, they were discovered. These laws reflect the underlying harmony in all creation, just as the harmony of number was not man's invention but rather an intrinsic part of creation. Those who recognize such harmonies are enriched with a sense of beauty of the Creator. The experience of beauty either of sight or of sound touches awareness deep within us that there is a unity and harmony in nature of which we are a part. Our response to beauty is an intrinsic part of our being. It is an inherent response to our Creator."

Holy Koran, SURAH 18, verses 57-59

The key number unlocking the structure of the Koran is **nineteen**. SURAH 74: 30 "It is guarded by the nineteen keepers" "And nineteen is over all." What does this mean? In 1974, Dr. RASHID KALIFA cracked the '**nineteen code**' demonstrating that this number provides the Koran a tightly woven structural matrix. The total number of SURAHs are 114 and is a multiple of 19 x 6. Six are the sides of the cube, expression of the primal unity of creative form. The six days of creation are a metaphor for the creation of the Law, the one unifying law of creation. The seventh day, the Throne of Authority, is the central point of the Law. Lord PAKAL was holding a cube in his right hand signifies, the six sides of the cube, plus the seventh central point constitute what is called the Heptagon on of Mind, the awakening of humanity into spiritual oneness.

Of the mathematically coded spiritual systems of thought, two are the most prominent: the I CHING or Book of Changes, originally developed in China, and based on a system of 64 (16 x 4) six-line 'hexagrams,' and the 'TZOLKIN' or Sacred Count of the Maya. While the mathematical structure of the 'I CHING' is flawless, its commentaries have accumulated over millennia, and the text is often obscure. Nonetheless, knowledge of the numerology of the 'I CHING' may be helpful in 'reading' the Koran and expanding its subliminally coded messages.

The TZOLKIN, being a system of 13 x 20, or **260 kin** (harmonic unit, day, person, event), is a master code containing within its structure keys even to the I CHING or DNA code. Yet the TZOLKIN itself reduces to an even simpler, more elegant code, the 0-19. It is this 0-19 code, the basis of the Maya VIGESIMAL mathematics system, which provides the strongest connection with the Koran, "It is guarded by the nineteen keepers" or even "Nineteen is over all." It is not a coincidence that the New Testament in the Bible from the first book of Mathew to the book of Revelation is a total of 260 chapters. When you add all the Kin number within the Mayan Calendar equals to the day sign of the Dog 13 Kin 130, well also it is not a coincidence that to this day sign goes chapter 13 of the Book of Romans and because the Dog has the position number 10 within the Mayan Calendar, let us reveal the hidden and powerful message that the book of Romans have for all of us:

"Love does no harm to its neighbor. Therefore love is the fulfillment of the Law."

Book of Romans Chapter 13:10

But who is really aware of the interconnectedness of all these ancient books of the Bible, Koran and the Mayan Calendar among others. It is time for all of us to start thinking if we really need to access to all these ancient knowledge. Clearly the hidden message of the Mayan Calendar, which we find the Dog 13 Kin 130 to be in the center of the Calendar it is revealing to us about the true meaning of love and the book of Romans is giving us the proof of that, it is time to be your own prophet and start using tools that would bring to you're the true cosmic knowledge.

In the Mayan code, **nineteen**, represented by three bars and four dots, is the prime number literally and notational containing all the other numbers and this is what the Koran says: *"It is guarded by the nineteen keepers" "Nineteen is over all."* The Mayan notations for nineteen hides a cosmic message, because the three dotes represent the three powerful lines (Galactic Plane, Galactic Equator and the Ecliptic) and the four dots may represent the four important celestial objects that would align at the end of the Mayan Great Cycle, Star X-3 of Cygnus, the Sun, Earth and Star Dog of Sirius. The '0' which represents 20 or any positional multiple of 20, is the creative principle that allows number to move in its power as the projection of the mind and will of Allah.

But it is **nineteen** which is the sum and supreme expression of all number, and hence of the mind and will of Allah the Creator. Thus, **nineteen** is the power of Allah's Mercy, the most sublime of the attributes of the supreme creative One. The Koran is derived from the Mother of the Book. The Mother of the Book is the universal archetypal store of all knowledge and wisdom. It is the Mother of the Book that rains down truth in various forms of commands of Allah. The Earthly Koran, on one hand, appears conditioned by language and culture; on the other hand, when read with a mind of innocence, the Koran reveals itself as a pure reflection of the Mother of the Book. If there is truth in other systems of spiritual endeavor, then these, too, derive from the Mother of the Book and possess kinship with the Koran, and will even be found within the Koran's mathematical structures. Reference is also often found in the Koran to the *'Book of Clear Records,'* which is to be revealed at the time of Judgment Day. The Book of Clear

Records is the complete account of all human thought and Earthly events, comparable to the AKASHIC Records. But the revelation of the Book of Clear Records at the time of Judgment Day may also be understood as a reference to the BIOSPHERE-NOOSPHERE transition.

According to Russian V. I. VERNADSKY, the transition of the biosphere into the NOOSPHERE - Earth's mental envelope- is the result of a climax of human self-reflective thought and industry upon the environment, resulting in an exponential change in consciousness in which all becomes revealed and known. In this way the final revelation of the Book of Clear Records is also known as the manifestation of Allah, the collective unified field of human self-reflective consciousness. All of this is in fulfillment of the Judgment Day message within the Holy Koran and the Mayan Calendar. Now we know that Holy Koran was completed by the Prophet Muhammad and was presented to the world as the final evidence and warning of the progress and development of Universal Religion in the world system of which Earth is the place of spiritual testing. Though the Koran entered into history and became identified subsequently as the Holy Book of the religion of historical Islam, no one owns the Koran. The sole author of the Koran is Allah. Muhammad, to paraphrase William Blake, was but the secretary, the Author is in Eternity.

Some scholars says that some of the definition of Allah are self-perfect, self-subsisting, the Eternal, Lord of the Worlds, Lord of the Great Star Sirius, He who creates, completes, guides, and measures, Lord of the close and near, Lord of the seen and the unseen, Master of the Day of Judgment. Among the Maya, Allah is known as HUNAB KU, the One God the one giver of movement and measurements who orders the universe by the one law. Among the indigenous of North America, He is WAKAN TANKA, the Great Spirit. For Allah is ever present, beyond grasping, ever-seeking ways to express His Compassion and Mercy and to show His Law and his will through innumerable signs manifest in innumerable ways to the innumerable creatures of His creation.

However, and for starters, we refer you to Dr. RASHAD KALIFAS book called "*Koran, The Final Testament.*" His study of the Koran with the computer resulted in the discovery of one of the greatest miracles of the holy book, as Allah described it in SURAH 74:35. Dr. KALIFA says that this miracle is based on the number 19, mentioned in SURAH 74. He lists a set of 19 facts that confirm that the Koran's has a mathematical coding on it:

The first verse (1:1), known as "BASMALA," consists of 19 letters ("Bismillah, ir Rahman, ir Rahim") and occurs 114 times, which is 19×6 . The total number of verses in the Koran is 6346, which is 19×334 . The Koran consists of 114 SURAHS, which is 19×6 . The famous first revelation (96:1-5) consists of 19 words. This 19-worded first revelation consists of 76 letters, which is 19×4 . SURAH 96, the first in the chronological sequence, consists of 19 verses. This first chronological SURAH is placed atop the last 19 SURAH. It consists of 304 Arabic letters, and $304 = 19 \times 16$.

The last revelation (SURAH 110) consists of 19 words. The first verse of the last revelation (110:1) consists of 19 letters. 14 different Arabic letters form 14 different sets of Koran Initials

and prefix 29 SURAHS. These numbers add up to $14+14+29 = 57$, which is 19×3 . The total of the 29 SURAH numbers where the Koran Initials occur is $2+3+7+50+68 = 822$, and $822+14$ (14 sets of Initials)=836, which is 19×44 . Between the first initialed SURAH (2) and the last initialed SURAH (68), there are 38 un-initialed SURAHS, which is 19×2 . Between the first and last initialed SURAHS there are 19 sets of alternating Initialed and un-initialed SURAHS. The Koran mentions 30 different numbers, which are: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 19, 20, 30, 40, 50, 60, 70, 80, 99, 100, 200, 300, 1000, 2000, 3000, 5000, 50,000, and 100,000. The sum of these numbers is 162,146 which is $19 \times 8534 = 162,146$.

The momentous discovery that the number 19 is the common denominator of the mathematical miracle of the Koran became a reality in January of 1974. This was coinciding with Zul-Hijjah 1393 AH. The Koran was revealed in 13 BH (Before Hijrah). This makes the number of years from the revelation of the Koran to the discovery of its miracle (1974) 1406 years (1393+13). It was more than interesting to notice that $1406 = 19 \times 74$. The only time the number 19 was mentioned in the Koran is in SURAH 74. The correlation between 19×74 lunar years and 1974 solar years could not escape notice, especially with the number 19 mentioned only in SURAH 74.

Suffice to say, the number nineteen permeates through, governs and authenticates the authorship of the Koran as being from God. For no one of this earth could have developed the intricate mathematical relationships within the Koran while maintaining a poetic and stylistic literature that has not been surpassed. The significant, for the number nineteen refers to the mathematical code and also appears to be the signature of God or Creator. God has created, through this coding, a means to authenticate and establish, without doubt, the legitimacy of the Koran as being the work of God and not the work of man. Also reveal through the 0-19 code when could be the judgment day at the end of times.

But why nineteen and why is it significant? All of God's original scriptures, not only the Koran, were apparently mathematically coded with the number nineteen or it's multiple. Even the universe bears God's divine signature. The number nineteen possesses unique mathematical properties beyond the scope of this writing, but for our purposes let's consider just the following:

1. The number nineteen is a prime number. In other words it is only divisible by itself and one. Numbers such as 2, 3, 5, 7, 11, 13, 17 and 19 all are prime numbers. God has chosen the number 19 as his signature prime number.
2. Nineteen embraces the first numeral (1) and the last numeral (9), as if to proclaim God's attribute in the Koran (57:3) as the "first and the Last". "He is the First and the Last, and the Outward as well as the Inward: and is established on the throne of His almightiness." Also in the Bible talks about he is the beginning and the end.
3. Nineteen looks the same in Semitic and European languages. Both components, 1 and 9, are the only numerals that look the same in these languages.
4. Nineteen possesses many peculiar mathematical properties. For example, 19 are the sum of the first powers of 9 and 10 ($9+10=19$) and the difference between the second

powers of 9 and 10 ($100-81=19$). This is why the Mayan Calendar had this same code within the Holy Cross of the Mayan Oracle.

5. Nineteen is the gemetrical value of the word "ONE" in all the scriptural languages – Aramaic, Hebrew and Arabic (please refer to the insert concerning the definition of gemetrical value). The number 19, therefore, proclaims the First Commandment in all the scriptures: that there is only ONE God. "

The Bahá'í calendar is structured such that a year contains 19 months of 19 days each, as well as a 19-year cycle and a 361-year (19×19) super cycle. The Báb and his disciples formed a group of 19, and there were 19 Apostles of Bahá'u'lláh. Nineteen sometimes has been considered significant in astrology or esoteric religion because it is the sum of the number of the constellations of the zodiac (12) and the number of the classically known "planets" (7, including the sun and moon). The recurring decimal cycles for $1/19$ to $(19-1)/19$ form a true magic square.

Amendment 19 in the United States Constitution gave women the right to vote also Chapter 19 in the Koran is called Mary. The Rhind Papyrus contained a problem to find x so that x plus one seventh of it will equal the prime number 19. An idiot is someone with an intelligence quotient (I.Q.) less than or equal to 19. The metonic cycle, which involves the phase cycle of the moon, is a period of about 19 Julian years. Earth's mass (5.9736×10^{24}) and volume (1.083×10^{12}) are both multiples of 19. Earth's volume is in fact a multiple of 192. 19 are the smallest prime mentioned a prime number of times in the Bible.

The scriptures are not the only mathematically composed creations of God where the number 19 is the common denominator. It is profound indeed that Galileo made his famous statement: *"Mathematics is the language with which God created the universe."* A plethora of scientific findings have now shown that the number 19 represents God's signature upon certain creations. This divine stamp appears throughout the universe in much the same manner as the signature of Michelangelo and Picasso identify their works

THE DAILY MAYAN HOLY CROSS OR ORACLE:

Your Mayan day sign or day keeper sign (in the daily Mayan Holy Cross or Oracle kin is known as the Destiny Kin) not only because is your day sign when you were born, but also because in every single day represent the Destiny of that specifically day which, is in the center of the Mayan Holy Cross or Oracle. Since every day has a solar Day sign, every day also has an Oracle. Every Oracle has the solar day sign or day keeper with four other Solar day Sign or Day Keepers (you will see that in the Mayan Holy Cross or Oracle the four day signs around the Destiny Kin have each different color within the Mayan Holy Cross or Oracle Red, White, Black and Yellow); the appropriate use of the Mayan Holy Cross or Oracle serves to reconnect with the essence of your ethereal body and also serves as memory code to access realms beyond our imagination. Understanding the Mayan Holy Cross or Oracle would give you the key to access divine energies, which affect our consciousness in the process of the nature of our human-space-time-mind-spirit form that will lead us to our own conscious evolution.

The daily Mayan Holy Cross or Oracle shows us that there is a game of energies involve within the Oracle that will give us **Guidance, Support, Challenge** and will provide us a **Hidden or Healing Power**. Your daily Mayan Oracle is the key to enter to another dimension that will give you a different perspective in how to use the Mayan Calendar as a spiritual tool that would allow you to reconnect with natural way of being, also would give you a clear understanding of why you are related in a specifically way with those energies around you, which they represent day signs within your personal Mayan Oracle.

LEARN HOW TO USE THE DAILY MAYAN HOLY CROSS OR ORACLE:

Using the daily Mayan Holy Cross or Oracle board, first find the Solar day sign of your Mayan Calendar day sign, which is called the Destiny Kin. The other four Days signs surrounding the central Day sign make up the destiny of the daily Oracle. The **Support Kin energy** is shown to the right; the **Challenging Kin energy** is to the left; the **Hidden or Healing Kin energy** is shown below. The **Guide Kin energy** is shown above the **Destiny Kin**.

Definition of the Kin energy within the Mayan Holy Cross or Oracle:

Destiny Kin: Is the Day sign power of each Day.

Support Kin: Is the Day sign that go along with the Destiny Kin and provides support and comfort.

Guide Kin: Is the Day sign that represent outcome to the Destiny Kin favored by the dominance of the same color.

Challenging Kin: Is the Day sign challenge and oppose the Destiny Kin providing strengthen to their cosmic memory.

Hidden or Healing Kin: This Day sign represent occult, surprise, mystery and unexpected factor to the Destiny Kin.

The following law pattern and law color apply to the Day sign kin:

Support kin: According to the daily energy of each day sign, any two-day signs whose code number equal 19.

Support Color: (Red and White) and (Black and Yellow).

Challenge Kin: According to the daily energy of each day sign, any two-day signs that are 10 numbers apart.

Challenge Color: (Red and Black) and (White and Yellow).

Hidden Kin: According to the daily energy of each day sign, any two days signs whose code number equal 21.

Hidden Color: (Red and Yellow) and (White and Black).

How can you find the Guide Kin sign by using the codes?

If the daily Solar Day Sign kin is coded by the energy-number or galactic tones:

Energies 1,6,11: Use the same Solar Day sign as the daily Solar Day Sign.

Energies 2,7,12: Add +12 to the Solar Day Sign of the daily Solar Day Sign.

Energies 3,8,13: Add +4 to the Solar Day Sign of the daily Solar Day sign.

Energies 4,9: Subtract -4 to the Solar Day Sign of the daily Solar Day Sign.

Energies 5,10: Add +8 to the Solar Day Sign of the daily Solar Day Sign.

Law of the Numbers-Energies or Tones in Mayan notation:

Energies 1,6,11: Mind-Time 1 dot

Energies 2,7,12: Time-Consciousness 2 dots

Energies 3,8,13: Consciousness-Spirit 3 dots

Energies 4,9: Spirit-Light 4 dots

Energies 5,10: Light-Life 5 dots

Law of Consciousness

1. Consciousness-Time

2. Light-Spirit

Law of Attraction

3. Thought-Mind

4. Action-Consequences

The Four Mayan houses within the Fifth:

Among the possible factorization of the TZOLKIN, those of 4×65 and 5×52 units may be the most prominent. These factorizations generate four (or five) different Worlds or Houses that are commonly part of Mesoamerican and Native American prophetic traditions (although many such prophecies have lost their direct connection to the TZOLKIN).

In the codices it seems that the TZOLKIN was divided into four equal segments each of 65 Kin or days ($4 \times 65 = 260$), resulting in four different Worlds with different colors, playing a very important role in ancient time. And because of the importance of the energy shifts between these four Worlds or Houses, their respective time-color spans are given within the 260 days cycle of the Sacred Calendar.

These four Houses or Worlds are in connection with the daily oracle, just as there are four seasons to a year there are four seasons to every day, known as "Worlds" or "Houses". So now instead of looking at your watch you should tune into the energies of the Worlds or Houses of each day.
